

6mm 1/285, 1/300 Castle Wall Components

Build your own castle or city wall enclosure to the size you need with these individual wall components.

Each component is of large formal stone effect cladding with crenulated walls and wall walks. Upper doorways on each of the square towers and main gate variants match the wall-walks and the pieces are suitable for ancients, dark ages or fantasy settings.

Please note the round towers do NOT have wall-walk openings as they are not designed to be part of the wall layout, they do however have a small inner doorway at ground level and fit with the walls and would be useful for angled wall layouts, needing only doorways to be 'painted in' where required.

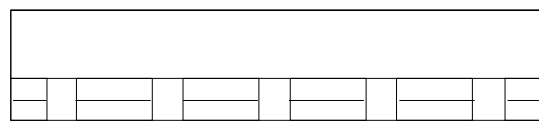

Overleaf are footprint outlines of each of the pieces so you can plan your own layout easily, and don't forget, we can cut the wall blanks to any length to suit on request.

6mm 1/285, 1/300 Castle Wall Components

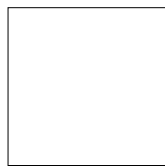

Actual size (within reason) footprint layouts of castle wall components to aid you in working out your requirements

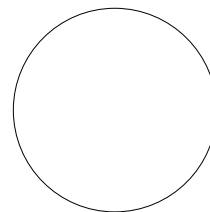

Main Gate : 70 x 25mm

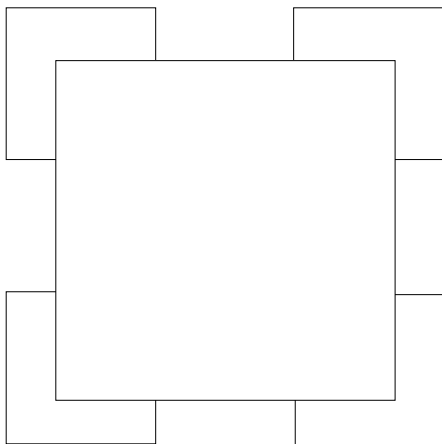

Wall Blank : 70 x 15mm

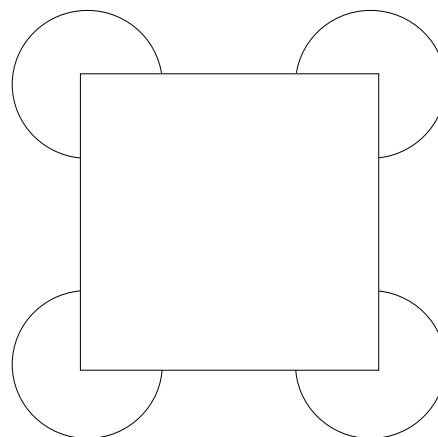

Square Towers : 21 x 21mm

Round Tower : 27mm dia

Square Tower Keep : 58 x 58mm

Round Tower Keep : 57 x 57mm
