

6mm 1/285, 1/300 (Z Scale) Wire & Foliage Trees

We are very excited to be introducing a new competitively priced range of wire and foliage trees to our ever growing inventory.

Suitable for 6mm scale modelling these trees are available in a range of heights from roughly 38mm to 50mm and in various shades of green, and although not shown below, 30mm high trees are also available by special order – suitable for orchards, new growth, or even bushes.

Made from fine wire and tree foliage these are very flexible trees that can easily be re-shaped to suit the environment they are used in, from small well-spaced orchard layouts all the way to full dense forests, each tree can be adjusted for height and shape, and whilst they have a substantial amount of foliage, can easily be dipped in flock for further diversity and also for different seasons.

G38

app 38mm x 14mm

G43

app 43mm x 16mm

G50

app 50mm x 20mm

LG50

app 50mm x 20mm

Available in packs of ten pieces, these can be supplied in larger quantities by special order.
